

Utility Line Bench

Lervad Line Bench is a beautiful piece of furniture and an obvious response to the demand for benching along windows, walls or in free standing groups.

The 30 mm thick bench top as well as the frame is made of solid beech.

On castors it becomes mobile.

Functionality

Lervad Line Bench is modular and is available in a short and a long version. The shorter has one module, the longer two, and both with the additional option of a shelf or cupboard.

It is unsurpassed as bench for light machinery. However, fitted with Lervad clamping tools it is well suited for student workplaces, too.

Lervad Storage Bench is an elegant merger between a versatile workbench and a spacious cupboard.

Storage Bench is available as stationary bench or as mobile bench on castors.

Utility Storage Bench

Functionality

The roller shutter requires less space for operation than hinged doors. It opens downwards and coils up under the cupboard. The interior is fully accessible. When pulling up the roller shutter it is locked automatically.

Storage Bench has shelved interior, but interior according to user specifications is available on demand.

Functional elegance

Flexibility

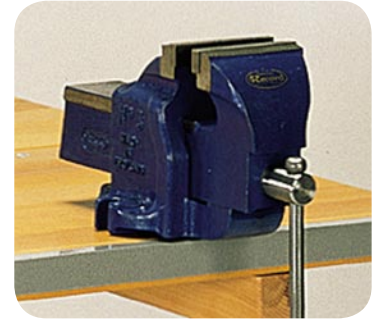

A selection of accessories makes Utility Bench ideal as multi function workbench as well.

With Lervad's Woodwork Vice, Hold-down Clamp and Portable Mechanics Vice most requirements are covered.

For metalwork

For permanent metalwork Lervad Utility Bench may be equipped with fixed mechanics vices.

In order to prevent damage and to assure extra durability an optional Protective Steel Rail can be layed into the edge of the bench.

Materials and design

Bench tops for Lervad Utility Bench are made of solid, kiln dried beech, immersed in linseed oil and lacquered on all sides and edges. Frames and cupboards are of lacquered beech with panels and shelves of lacquered birch plywood. Roller shutters are made of beech veneered lightweight laminated ply strips glued to a polyester back with hand rail of solid beech, all lacquered.

Utility Bench with open gate frame is delivered disassembled with bolts and assembly instruction. Utility Bench with cupboard is delivered fully assembled. Accessories are packed separately.
